The graph illustrates the growth of the network over a 100-hour period. The blue line, representing one configuration, starts at approximately 10,000 nodes and reaches about 50,000 nodes by 100 hours. The red line, representing another configuration, starts at approximately 10,000 nodes and reaches about 45,000 nodes by 100 hours. Both configurations show a steady increase in the number of nodes over time, with the blue configuration consistently maintaining a higher node count after the 50-hour mark.
